ABOUT ME

Hello! My name is Lance Alipio Velasquez. I am a college student from the Philippines with an interest in technology, engineering, and innovation. I enjoy learning about electronics, computer systems, networking, programming, and the Internet of Things (IoT).
As a student, I strive to improve my knowledge and skills through academic activities, research, and hands-on projects. One of my projects is SyncShot Technologies, which focuses on developing an IoT-based synchronization system for creative industries. Through this project, I have learned the importance of teamwork, problem-solving, planning, and creativity.
I believe that learning is a continuous process, and every challenge is an opportunity to grow. My goal is to become a skilled professional who can use technology and engineering to develop practical solutions to real-world problems.
I am committed to improving myself, gaining new experiences, and working hard to achieve my academic and personal goals.

EDUCATION

Institute of Creating Computer Technology (ICCT) | 2023 and present

Asia Technological School of Science and Arts | 2016 - 2018

PROJECT EXPERIENCE

Project Manager | Project Nexus COEPRO19 - ROB GONZALES (2026)
- Led and coordinated team activities to achieve project objectives.
- Assigned tasks, monitored progress, and managed project timelines.

SyncShot Technologies | Computer Engineering Practice and Design COEPD01 - Ivanlee Mendoza (2026)
- Coordinated project documentation, budgeting, and presentations.
- Collaborated with team members to resolve issues and meet project requirements.

Bed Micro-Movement Monitor for Sleep Quality Assessment | Embeded System COEPRO15 - Meiko Rios (2025 - 2026)
- Coordinated team tasks and monitored project progress throughout system development.
- Organized project timelines, documentation, and testing activities.
- Supervised team collaboration during hardware integration and system troubleshooting.
- Coordinated project reports and presentation materials for academic evaluation.

SKILLS

- Adaptability and Willingness to Learn
- Canva / Excel
- Basic Computer Hardware and Troubleshooting
- Microsoft Word and Powerpoit
- Problem-Solving and Critical Thinking
